**Interactive Documentary** Kathleen M. Ryan,David Staton,2022-03-17 Interactive documentary is still an emerging field that eludes concise definitions or boundaries. Grounded in practice-based research, this collection seeks to expand the sometimes exclusionary field, giving voice to scholars and practitioners working outside the margins. Editors Kathleen M. Ryan and David Staton have curated a collection of chapters written by a global cohort of scholars to explore the ways that interactive documentary as a field of study reveals an even broader reach and definition of humanistic inquiry itself. The contributors included here highlight how emerging digital technologies, collaborative approaches to storytelling, and conceptualizations of practice as research facilitate a deeper engagement with the humanistic inquiry at the center of documentary storytelling, while at the same time providing agency and voice to groups typically excluded from positions of authority within documentary and practice-based research, as a whole. This collection represents a key contribution to the important, and vocal, debates within the field about how to avoid replicating colonial practices and privileging. This is an important book for practice-based researchers as well as advanced-level media and communication students studying documentary media practices, interactive storytelling, immersive media technologies, and digital methodologies.

**The Struggle for the European Constitution** Michael O'Neill,2008-11-28 The European Union (EU) Constitution was one of the most important developments in the history of the EU, aiming to make the EU more transparent, relevant and accountable to the citizens of its member states. Current anxieties over the pace and direction of EU integration place this comprehensive study at the forefront of the EU governance debate. O'Neill goes far beyond a simple account of the EU Constitution, focussing also on the response to the current crisis of confidence between the Union and its citizens and how those in power have responded to the challenge. Making a substantial contribution to literature on the EU, key discussion points include: The political crisis behind the Constitution The power politics at work in the negotiations How the

Constitution affects EU policymaking The impact on the citizens of the EU This is essential reading for all those wishing to understand the background to one of the key areas within European Politics. Michael O'Neill is Jean Monnet Professor in EU Politics at Nottingham Trent University.

**Orbital Debris Prevention and Mitigation Efforts among Major Space Actors** Marc Carns,2023-07-03 In the absence of formal treaty law, orbital debris has grown exponentially in our most valuable orbital regions. To address this problem, many major spacefaring programs have implemented independent laws and policies meant to mitigate the release and overall threat of debris. However, these individual efforts have not translated into a cohesive international set of regulations to address the growing debris problem. Fortunately, there may exist unappreciated similarities among major international programs, either in whole or part, that once identified could lay the groundwork for the recognition of customary international law. This book reviews a number of major programs in depth and seeks to answer if any commonality among them has likely established customary international law.

**The Scientific Bases for the Preservation of the Hawaiian Crow** National Research Council,Division on Earth and Life Studies,Commission on Life Sciences,Committee on the Scientific Bases for the Preservation of the HawaiianCrow,1992-02-01 The Hawaiian Crow, or 'Alala, once an inhabitant of large forested areas of Hawaii, is now found only in the wild in a relatively small area of the central Kona coast. The decline of the 'Alala is part of a larger phenomenon of reduction and extinction of forest birds throughout Polynesia that has been associated with human colonization. It is a symptom of underlying ecological problems. In this book, a committee of experts in ornithology, captive propagation, conservation biology, population genetics, and ecology analyzes existing data about the 'Alala and details its findings, conclusions, and recommendations concerning recovery efforts for this endangered bird.

**Environmental Impacts from the Development of Unconventional Oil and Gas Reserves** John Stolz,Daniel Bain,Michael Griffin,2022-08-18 The development of unconventional oil and gas shales using hydraulic fracturing and directional drilling is currently a focal point of energy and climate change discussions. While this technology has provided access to substantial reserves of oil and gas, the need for large quantities of water, emissions, and infrastructure raises concerns over the environmental impacts. Written by an international consortium of experts, this book provides a comprehensive overview of the extraction from unconventional reservoirs, providing clear explanations of the technology and processes involved. Each chapter is devoted to different aspects including global reserves, the status of their development and regulatory framework, water management and contamination, air quality, earthquakes, radioactivity, isotope geochemistry, microbiology, and climate change. Case studies present baseline studies, water monitoring efforts and habitat destruction. This book is accessible to a wide audience, from academics to industry professionals and policy makers

interested in environmental pollution and petroleum exploration.

**The History of Panama** Robert C. Harding,2006-05-30 As the narrowest stretch of land in the Central American isthmus, Panama's geographical location has for millenia made it the crossroads for traders, travelers, European pirates, and world superpowers. Panamanian history is replete with explicit or tacit domination by others. In the post-Columbus period, Panama was first a Spanish colony, then a province of Colombia, and then finally a quasi-territory of the United States during the 20th century. Suffering invasion by the United States in 1989 to oust dictator Manuel Noriega and then receiving full ownership of the Panama Canal at the end of 1999, Panama has rebuilt itself into a strong, if contentious democracy. This work chronicles and highlights the key events and figures in the country's past 500 years of history, from Columbus to current day. It begins with Panama's colonial period, demonstrating how even in its early day, the isthmus was seen by the Spanish as merely a transshipment point. It then examines the post-Spanish period when the Colombian province of Panama became a forgotten backwater until European powers began vying for canal rights, leading to an ill-fated French effort. The main portion of the book details the events, figures, and intricacies of the Panama-U.S. relationship, which dominated Panama's history for the entire 20th century. It closes with an examination of the gains and challenges the country has faced in the post-U.S. invasion years.

**Statebuilding and Intervention** David Chandler,2014-05-01 This edited book sets out and engages with some of the key policies, practices and paradigms of external intervention in the case of state support and reconstruction. Many assumptions about statebuilding have been reconsidered in the wake of Iraq, and ongoing problems in other states such as Afghanistan, Bosnia and Kosovo. Rather than being a regional survey or a policy-orientated 'lessons learned' book, this collection explores the broader framing of policy goals, statebuilding practices and the consensus on the need for Western states and international institutions to be engaged in this policy area. The volume is divided into three parts: the first engages with some of the key policy frameworks and conceptual issues raised by recent statebuilding interventions; the second considers core statebuilding practices; and the third reconsiders statebuilding paradigms more broadly. The essays open up debate and critical discussion in the field at a time when many advocates of extending statebuilding intervention suggest that the complex nature of the problems of non-Western states and societies mean that it will inevitably be contradictory and limited in its results.

*Handbook of Energy Law in the Low-Carbon Transition* Giuseppe Bellantuono, Lee Godden, Hanri Mostert, Hannah Wiseman, Hao Zhang,2023-05-22 The low-carbon transition is ongoing everywhere. This Handbook, written by a group of senior and junior scholars from six continents and nineteen countries, explores the legal pathways of decarbonisation in the

energy sector. What emerges is a composite picture. There are many roadblocks, but also a lot of legal innovation. The volume distils the legal knowledge which should help move forward the transition. Questions addressed include the differences between the decarbonization strategies of developed and developing countries, the pace of the transition, the management of multi-level governance systems, the pros and cons of different policy instruments, the planning of low-carbon infrastructures, the roles and meanings of energy justice. The Handbook can be drawn upon by legal scholars to compare decarbonisation pathways in several jurisdictions. Non-legal scholars can find information to be included in transition theories and decarbonization scenarios. Policymakers can discover contextual factors that should be taken into account when deciding how to support the transition.

The Grand Food Bargain Kevin D. Walker, 2019-03-26 When it comes to food, Americans seem to have a pretty great deal. Our grocery stores are overflowing with countless varieties of convenient products. But like most bargains that are too good to be true, the modern food system relies on an illusion. It depends on endless abundance, but the planet has its limits. So too does a healthcare system that must absorb rising rates of diabetes and obesity. So too do the workers who must labor harder and faster for less pay. Through beautifully-told stories from around the world, Kevin Walker reveals the unintended consequences of our myopic focus on quantity over quality. A trip to a Costa Rica plantation shows how the Cavendish banana became the most common fruit in the world and also one of the most vulnerable to disease. Walker's early career in agribusiness taught him how pressure to sell more and more fertilizer obscured what that growth did to waterways. His family farm illustrates how an unquestioning belief in "free markets" undercut opportunity in his hometown. By the end of the journey, we not only understand how the drive to produce ever more food became hardwired into the American psyche, but why shifting our mindset is essential. It starts, Walker argues, with remembering that what we eat affects the wider world. If each of us decides that bigger isn't always better, we can renegotiate the grand food bargain, one individual decision at a time.

**Advances in Bioethanol** Pratima Bajpai, 2013-08-30 The book provides an updated and detailed overview on advances in bioethanol. Economic Woman Frances Raday, 2019-05-14 The author introduces the concept of economic woman and makes her visible in duality with and opposition to the exclusive model of economic man. Economic man has epitomized neo-liberal capitalism, which embraces competition and maximization of profit, resulting in a steep increase in economic inequality. The book demonstrates that women's inequality is a crucial factor in economic inequality, which cannot be fully understood

without relating to women's situation, and that economic woman cannot thrive in the conditions of economic inequality created under global neo-liberalism. Emphasising the international human rights guarantees of women's right to equality in all fields of life, the author documents woman's increased participation in political, public, financial and corporate institutions, employment and entrepreneurship, with some women reaching high profile positions. Nevertheless, using global data, she reveals that economic woman lags behind, with a severe economic power deficit, an unfulfilled promise of equal employment opportunity, a gendered impact of poverty and barriers to gender equality in the family. The book analyses the trap of women's increased burden of breadwinning in the context of discriminatory laws and practices, infrastructural failures and policy gaps, which preempt achievement of gender equality in economic life. The book is intended for the general reader, academics, students, policy makers and NGOs. It shows economic woman at a global crossroads between a universal paradigm of gender equality and pervasive barriers to equal economic opportunity. The author demonstrates that tackling gender inequality, restoring welfare priorities and reducing economic inequality are inextricably linked. Human rights and governments have a vital role to play in addressing them all, to create a sustainable economic infrastructure for the lives of women and men.

**Beyond the Iraq War** Michael Heazle, Iyanatul Islam, 2006-01-01 This book critically analyses the topic of US-led external interventions in the affairs of developing countries by using one of the most contested experiments of modern times, namely, the invasion of Iraq and its aftermath. The March 2003 invasion of Iraq has so far failed to deliver the benefits and outcomes its supporters anticipated, prompting international discussion as to whether the promises of externally-led nation-building (as an attempt to mould rogue states in a democratic, market-friendly fashion) are outweighed by the kinds of pitfalls and perils of intervention that have come to characterise the Iraq experience. This book identifies and addresses the major issues emerging from the current debate including the evolution of external interventionism as an idea, an explanation of what went wrong in post-Saddam Iraq and why the Iraq experiment is flawed by the Bush administration's refusal to

address long standing political and historical grievances among Muslims as part of the 'War on Terror'. The contributors assess the troubled relationship between Islam and the West, the prospects for democracy in the Middle East, foreign policy debates in the US, and how economics and politics are juxtaposed in a highly contentious manner in any project of externally-driven nation-building. Beyond the Iraq War brings together scholars and practitioners in an attempt to move beyond the polemical dimensions of the existing debate and provide a balanced analysis of what the Iraq enterprise can tell us about the brand of external interventionism espoused by the Bush administration and also the lessons it holds for any future interventions into the affairs of states. It combines a mix of disciplines, most notably international relations and economics as well as theory and empirical evidence. The book is written in a non-technical, but rigorous, manner in order to make complex and diverse issues accessible to the general reader This fascinating and scholarly work will appeal to academics and scholars in the fields of political economics, political science and international relations. Policymakers, journalists and media commentators will also find this work to be of great interest and value.

Developments in Bioethanol Pratima Bajpai,2020-10-08 This book provides an updated and detailed overview on the recent developments of bioethanol technology. It looks at the historical perspectives, chemistry, sources and production of ethanol and discusses biotechnology breakthroughs and promising developments, its uses, advantages, problems, environmental effects and characteristics. In addition, it presents information about ethanol in different parts of the world and also highlights the challenges and future of ethanol. The first edition of this book was published as a SpringerBriefs in 2013. Since then, many new developments have taken place in the last six years. This new edition will highlight the evolution in bioethanol development from first-generation production to the futuristic fourth-generation bioethanol production, the various constraints and challenges involved, and the scope for development. This book caters to the audience who are interested in alternative transportation fuels which are both biodegradable and sustainable to the environment.

Vampires and Zombies Dorothea Fischer-Hornung,Monika Mueller,2016-02-02 The undead are very much alive in contemporary entertainment and lore. Indeed, vampires and zombies have garnered attention in print media, cinema, and on television. The vampire, with roots in medieval European folklore, and the zombie, with origins in Afro-Caribbean mythology, have both undergone significant transformations in global culture, proliferating as deviant representatives of the zeitgeist. As this volume demonstrates, distribution of vampires and zombies across time and space has revealed these undead figures to carry multiple meanings. Of all monsters, vampires and zombies seem to be the trendiest--the most regularly incarnate of the undead and the monsters most frequently represented in the media and pop culture. Moreover, both figures have experienced radical reinterpretations. If in the past vampires were evil, blood-sucking exploiters and zombies were brainless victims, they now have metamorphosed into kinder and gentler blood-sucking vampires and crueler, more relentless, flesh-eating zombies. Although the portrayals of both vampires and zombies can be traced back to specific regions and predate

mass media, the introduction of mass distribution through film and game technologies has significantly modified their depiction over time and in new environments. Among other topics, contributors discuss zombies in Thai films, vampire novels of Mexico, and undead avatars in horror videogames. This volume--with scholars from different national and cultural backgrounds--explores the transformations that the vampire and zombie figures undergo when they travel globally and through various media and cultures.
