Sociology John J. Macionis, Kenneth Plummer, 2008 This textbook provides a survey of sociology. As the scientific study of society, sociology is a social science which uses various methods of empirical investigation and critical analysis to develop a body of knowledge about human social activity. It focuses on the influence of our relationships around us and how they affect our behaviors and attitudes. The author approaches this subject with a desire to help students find and use sociology in everyday life.

Our Social World Jeanne H. Ballantine, Keith A. Roberts, 2011-10-26 In this brief text, two leaders of the Teaching Sociology movement encourage students' development of their sociological imaginations through role-taking. Assuming the role of a child living in poverty in India or of a member of an African tribe, students learn to re-envision their global society. An innovative, integrated framework provides core sociological concepts, while features such as Contributing to Our Social World enable students to "do" public sociology. Our Social World: Condensed Version presents the perspective of students living in the larger global world.

Recognizing Race and Ethnicity, Student Economy Edition Kathleen Fitzgerald, 2019-07-05 To better reflect the current state of research in the sociology of race/ethnicity, this book places significant emphasis on white privilege, the social construction of race, and theoretical perspectives for understanding race and ethnicity.

Miseducating Americans Richard F. Hamilton, 2015-01-31 In *Miseducating Americans*, Richard F. Hamilton examines accounts of American history appearing in textbooks and popular accounts and compares these with the reports contained in scholarly monographs. The task: to determine how certain myths and misconstructions became accepted as recorded history. Hamilton provides much needed correction of those misleading accounts. Was America historically the "land of the free?" Not if you take into account slavery, discrimination, and post-Civil War segregation policies. Was America in the late nineteenth century truly expansionist, as American textbooks imply, or did it actually capitalize on unexpected political and economic opportunities, like Russia's desire to rid itself of Alaska? Was the acquisition of the Philippines a zealous profit-seeking effort aiming for "the China market," or the fortuitous consequences of a move against Spain during the Spanish-American War? *Miseducating Americans* debunks many commonly accepted explanations of historical facts. It contends that many accounts are oversimplifications, and some are one-sided depictions of virtue. Hamilton traces the sources of these misconstructions, which mostly come from history textbooks written by authors aiming for "popular audiences." He then offers explanations as to how and why the inaccuracies have been repeated and passed on.

Recognizing Race and Ethnicity, 2018-05-15 This book approaches the study of race/ethnicity through a sociological lens. It focuses on a few social policies that are perceived as race-related, such as affirmative action, to an understanding of the historical racialization of the US welfare state overall.

Challenging Tradition Perry Shaw,Havilah Dharamraj,2018-03-31 The surge of theological education in the rapidly growing church of the Majority World has highlighted the inadequacy of traditional Western methods of thinking and learning to fully accomplish the task at hand. The limitations of current theological education are embodied in the formation and assessment of the master's or doctoral dissertation; processes that follow a linear-empiricist tradition developed in the West and exported to the Majority World. *Challenging Tradition: Innovation in Advanced Theological Studies* highlights the need for these traditions to be reconsidered in every context throughout the world. Drs Shaw and Dharamraj, with their team of contributors, present innovations in research and documentation that demonstrate how we may better prepare theological leadership through means that are contextually relevant and locally meaningful.

Recognizing Race and Ethnicity Kathleen J. Fitzgerald,2017-03-14 Despite promising changes over the last century, race remains a central organizing principle in US society, a key arena of inequality, power, and privilege, and the subject of ongoing conflict and debate. In this second edition of *Recognizing Race and Ethnicity*, Kathleen J. Fitzgerald continues to examine the sociology of race and encourages students to think differently by challenging the notion that we are, or should even aspire to be, color-blind. Fitzgerald considers how race manifests in both significant and obscure ways by looking across

all racial/ethnic groups within the socio-historical context of institutions and arenas, rather than discussing each group by group. Incorporating recent research and contemporary theoretical perspectives, she guides students to examine racial ideologies and identities as well as structural racism; at the same time, she covers topics like popular culture, sports, and interracial relationships. This latest edition includes an expanded look at global perspectives on racial inequality, including international migration and Islamophobia; updated examples of contemporary issues, including the Black Lives Matter movement; more emphasis on intersectionality, specifically the ways sexuality and race intersect; and an extended discussion on why the sociology of race and the sociological imagination matter. *Recognizing Race and Ethnicity* continues to reflect the latest sociological research on race/ethnicity and provides unparalleled coverage of white privilege while remaining careful not to treat white as the norm against which all other groups are defined.

Sociology John J. Macionis, Kenneth Plummer, 2012 This volume provides a fresh approach to the study of introductory sociology. It looks at the social world from a global perspective, recognising that it is increasingly difficult to understand one country in isolation from another.
